(54) Title: DISPLAY OF THE THUMBNAILS OF A PHOTOGRAPHIC SUPPORT ON A TERMINAL

WO 03/085954 A1

(57) Abstract: The present invention is in the technical field of imaging. It relates to an application used in the photographic field. The invention relates more especially to a process applied in the field of hybrid photography, i.e. based on analog and digital image data. The invention process enables the display of the images on the screen (2) of a terminal (1), from the identifier (14) of an analog photographic support (10) representing said images. The invention process operates the instructions of a program enabling a user of the terminal (1) to display virtually in real time one or more digital images (22) corresponding to the thumbnails (11) of the photographic support (10). The present invention is mainly used by photographers who possess portable terminals that can display digital images.
